AutoPDF Orchestrator Sample

A small sample document for testing smart split, summaries and export. It has four chapters with bookmarks, two pages each.

Chapter 1: The Haunted Archive

Every office has a haunted archive: folders of PDFs nobody dares to open. Contracts, manuals and reports pile up until finding one fact takes an afternoon. AutoPDF Orchestrator was built to bring that archive back to life. It reads a document in the browser, finds its chapters and turns each one into a short, searchable note.

Chapter 1: The Haunted Archive (continued)

Contracts, manuals and reports pile up until finding one fact takes an afternoon. AutoPDF Orchestrator was built to bring that archive back to life. It reads a document in the browser, finds its chapters and turns each one into a short, searchable note. This page continues the chapter so each section spans more than one page.

Chapter 2: Splitting by Bookmarks

Many PDFs carry an outline of bookmarks that points to the first page of each chapter. The tool reads that outline and resolves every destination to a real page number. Each chapter becomes its own section, which can be exported as a separate PDF file. When a document has no bookmarks, the tool looks for a table of contents instead.

Chapter 2: Splitting by Bookmarks (continued)

The tool reads that outline and resolves every destination to a real page number.
Each chapter becomes its own section, which can be exported as a separate PDF file.
When a document has no bookmarks, the tool looks for a table of contents instead.
This page continues the chapter so each section spans more than one page.

Chapter 3: Summaries Without the Cloud

Each section is summarized locally with an extractive method. Sentences are scored by term frequency and position, and the best three are kept in their original order. No text ever leaves the browser, so private documents stay private. Keywords are picked the same way after removing common stop words.

Chapter 3: Summaries Without the Cloud (continued

Sentences are scored by term frequency and position, and the best three are kept in their original order. No text ever leaves the browser, so private documents stay private. Keywords are picked the same way after removing common stop words. This page continues the chapter so each section spans more than one page.

Chapter 4: Exporting the Results

The final step packs everything into one zip archive. Inside are the section PDFs and a Markdown notes file with every summary and keyword list. The notes can be pasted straight into a wiki, a ticket or a study guide. That is how a scary pile of PDFs becomes a tidy, useful library.

Chapter 4: Exporting the Results (continued)

Inside are the section PDFs and a Markdown notes file with every summary and keyword list. The notes can be pasted straight into a wiki, a ticket or a study guide. That is how a scary pile of PDFs becomes a tidy, useful library. This page continues the chapter so each section spans more than one page.
